The Journal of Nuclear Medicine will publish original articles in the following areas: (1) basic sciences, (2) in vivo function studies, (3) in vitro studies, (4) radionuclide imaging, (5) clinical studies, and (6) therapeutic applications of nuclear techniques. In addition, manuscripts not exceeding 400 words may be submitted if no illustrations or tables are required.

In preparing manuscripts for submission, please note the following:

Manuscripts must be typed double spaced on one side of 8½ x 11-in. bond paper with at least 1-in. margin on each side. The original with one carbon must be provided.

Tables must be typed on separate sheets of bond paper, numbered consecutively with Arabic numerals and have titles (in caps) centered. Make titles descriptive and provide headings for all columns. Omit vertical lines. Place horizontal lines under title and under column headings.

Illustrations must be submitted in photographic form (8 x 10-in. glossy prints) or as original ink drawings. Hand lettering is not acceptable. Two sets of illustrations must be submitted. Labeling should be clear, set in initial caps and lower case. Poor-quality illustrations will be returned to the author to be redrawn because good quality is essential for clarity of presentation. Photographs should be mounted on white cardboard. Illustrations should be identified by a label pasted on the back (do not write on the back of photographs with pen or pencil) indicating number, author's name and an abbreviated article title. The top of each illustration must be clearly marked. Descriptive legends with sufficient detail to make illustrations understandable without reference to text should be grouped on a separate sheet double spaced. Authors will be charged $8 apiece for every illustration over four.

References must be cited in the text by number (underlined) in parenthesis in order of appearance. A consecutive list according to reference number must be submitted on a separate page double spaced. Literature references must be cited in the following order: name of author (last name first, then initials with no punctuation, cap and lower case), title of article (initial cap and lower case), name of periodical abbreviated and underlined for italic (check List of Journals Indexed in Index Medicus for abbreviation), volume number, colon, first to last page of article, year. Up to three authors will be listed; one or more authors past the third will be designated "et al." Example: Poe ND, Dorf EK, Swanson LA, et al: Misinterpretation of lung scans in the diagnosis of pulmonary embolism. J Nucl Med 8: 345-362, 1967. For books, the order is the following: author's last name with initial(s); Title of book underlined in caps and lower case. City of publication, publisher, year of publication, page citation. Example: Berne E: Principles of Group Treatment. New York, Oxford University Press, 1966. p. 26. Chapters in books will be treated as journal articles with regard to capitalization.
