I. EDITORIAL POLICY

The Journal of Nuclear Medicine publishes material of interest to the practitioners in the broad field of nuclear medicine. Proffered articles describing original laboratory or clinical investigations, case reports, technical notes and letters to the editor will be considered for publication. Occasionally, invited articles, editorials, and reviews of selected topics will be published. Manuscripts, including illustrations and tables, must be original and not under consideration by another publication.

The Journal of Nuclear Medicine has agreed to receive manuscripts in accordance with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals as cited in the following sources: Ann Intern Med (1988; 108:258–265) and Br Med J (1988; 296:401–405). In preparing manuscripts, authors should follow the Uniform Requirements for Manuscripts Submitted to Biomedical Journals and the specific author instructions detailed below. Also, helpful guidance in conforming to the “Uniform Requirements” may be found in Medical Style & Format: An International Manual for Authors, Editors, and Publishers by Edward J. Huth, MD (Philadelphia: ISI Press; 1987).

II. MANUSCRIPT SUBMISSION

Submit one original and three copies of the manuscript and four copies of the figures to:

Stanley J. Goldsmith, MD
The Journal of Nuclear Medicine
New York Hospital-Cornell Medical Center
525 E. 68th St.
Box 311
New York, NY 10021
(212) 746-9066
FAX: (212) 746-9056

Original manuscripts will not be accepted by facsimile.

All manuscripts should be accompanied by a covering letter from the author responsible for correspondence regarding the manuscript. The covering letter should contain the following copyright disclosure statement in compliance with the Copyright Revision Act of 1976, effective January 1, 1978.

Upon acceptance by The Journal of Nuclear Medicine, all copyright ownership for the article is transferred to The Society of Nuclear Medicine. We, the undersigned co-authors of this article, have contributed significantly to and share in the responsibility for the release of any part or all of the material contained within the article noted above. The undersigned stipulate that the material submitted to The Journal of Nuclear Medicine is new, original and has not been submitted to another publication for concurrent consideration.

We also attest that any human and/or animal studies undertaken as part of the research from which this manuscript was derived are in compliance with regulations of our institution(s) and with generally accepted guidelines governing such work.

We further attest that we have herein disclosed any and all financial or other relationships which could be construed as a conflict of interest, and that all sources of financial support for this study have been disclosed and are indicated in the acknowledgement.

This statement must be signed by all of the listed co-authors.

Copyright requirement does not apply to work prepared by United States government employees as part of their official duties.

The covering letter should also contain a statement that the manuscript has been seen and approved by all authors and should give any additional information which may be helpful to the Editor. If there has been any prior publication of any part of the work, this should be acknowledged and appropriate written permission included. If color illustrations are included, a statement that the author(s) is (are) willing to assume the cost of color separation and reproductions is requested.

You may suggest individuals who could serve as reviewers for your manuscript.

III. REVIEW PROCEDURE

Submitted manuscripts are reviewed for originality, significance, adequacy of documentation, reader interest and composition.

Manuscripts not submitted in accordance with these instructions will be returned to the author for correction prior to beginning the peer review process.

All manuscripts considered suitable for review are evaluated by a mini-
mum of two reviewers. It is unusual for a manuscript to be accepted for publication without first undergoing a process of revision. Revised manuscripts are judged on the adequacy of responses to suggestions and criticisms made during the initial review. Two copies of the revised manuscripts should be sent with a diskette (3.5 or 5.25-in.) containing the word processing file of the manuscript. The disk should be labeled with the name of the file, word processing software, operating environment (i.e., DOS, Windows) and platform (i.e., IBM, Macintosh). A diskette need not be sent before a revision is requested. JNM reviewers may seek assistance from sources within their institution when reviewing manuscripts, but the data reported in submitted manuscripts must be kept confidential at all times.

All accepted manuscripts are subject to editing for scientific accuracy, clarity, and style. Authors of accepted manuscripts may also incur printing charges ($80 per page) for articles exceeding eight printed pages. A list of charges will be sent to the author with the acceptance letter.

IV. FORMAT REQUIREMENTS

A. General Requirements

Manuscripts must be written in English. When necessary, authors should seek the assistance of experienced, English-speaking medical editors. A medical editor should review the final draft of the original and any revisions of the manuscript.

Type the manuscript on white bond paper, 8 1/2 X 11 in. (21.6 X 27.9 cm), with margins of at least 1 1/4 in. (4 cm). Type on one side of the paper only, double spacing every page. Begin each of the following sections on separate pages and in the following order: title page, abstract, acknowledgments, references, tables (each on a separate page), and legends. Number pages consecutively, beginning with the title page. Type the name of the senior author and page number in the upper right-hand corner of each page.

B. Title Page

The title page of the manuscript should include: (1) concise and informative title (fewer than 200 characters); (2) short running headline or footnote of no more than 40 characters (letters and spaces) placed at the bottom of the title page and identified; (3) complete byline, with first name, middle initial, and last name of each author and highest academic degree(s), up to ten authors may be cited; (4) complete affiliation for each author, with the name of department(s) and institution(s) to which the work should be attributed; (5) disclaimer, if any; (6) name, address, and telephone number of one author responsible for correspondence about the manuscript; and (7) name and address of author to whom reprint requests should be directed, or statement that reprints are not available from the author. Financial support for the work should be noted in a statement on this page.

C. Abstract

A structured abstract must be included with each original scientific manuscript submitted to the JNM. The abstract should contain a maximum of 250 words and include four clearly identifiable elements of content: rationale (goals of the investigation), methods (description of study subjects or experiments, animals and observational and analytical techniques), results (major findings), and principle conclusions. Except for the rationale, which should state the goals of the investigation, these sections should be preceded by headings (i.e., Methods, Results and Conclusion). Three to five key words should also be submitted with the abstract.

D. Text

1. Presentation

Generic names should be used throughout the text. Identify instruments and radiopharmaceuticals by manufacturer name and address in parentheses and describe procedures in sufficient detail to allow other investigators to reproduce the results.

The text of original scientific and methodology articles is usually divided into the following sections: Introduction, Materials and Methods, Results, Discussion, and Summary or Conclusion. The text of original, scientific papers, exclusive of the abstract, legends, tables and references, should not exceed 5000 words.

Case Reports should contain a concise description of no more than 1250 words, exclusive of the abstract, legends, tables and references, illustrated with no more than three figures, emphasizing the nuclear medicine aspects and including methodology, data, and correlative studies.

Letters should concern previously published material or matters of general interest and should be brief and to the point. A diskette (3.5 or 5.25-in.)
Listed below are the companies that have advertised in this issue. Simply circle the numbers of those companies you are interested in, fill out the information below, and mail or FAX this to the Society of Nuclear Medicine, Advertising Department, 1850 Samuel Morse Drive, Reston, VA 20190, Fax 703-708-9015. We will forward this information to the advertiser(s).

disk only) containing a copy of the word processing file of the letter should accompany a hard copy version of the manuscript. The disk should be labeled as described above in Review Procedure. Letters should also be accompa-
nied by a copyright disclosure statement as specified above in Manuscript Submission. All material is subject to editing. Letters commenting on previ-
ously published articles should be received within one year of the date of the referenced article’s publication. Letters should contain no more than 10 re-
ferences.

JNM policy prohibits the use of hyperbolic terms or phrases in the title, abstract, or body of the text of submitted manuscripts. Qualitative claims as to the superiority of a research (superior, best . . . ) or the primacy of an idea or instrument should be omitted.

2. References

References should be cited in consecutive numerical order at the first men-
tion in the text and designated by the reference number underlined in and
parentheses. References appearing in a table or figure should be numbered sequentially with those in the text.

The reference list must be typed double-spaced and numbered consecu-
tively, as in the text. JNM follows Index Medicus style for references and
abbreviates journal names according to the List of Journals Indexed in Index
Medicus. "Unpublished observations" and "personal communications" should
not be used as references, although written—not verbal—communications may
be noted as such in the text. References cited as "in press" must have been
accepted and not merely in preparation or submitted. The author is responsi-
ble for the accuracy of all references and must verify them against the original
document.

For journal articles, list all authors when six or less; for seven or more

For books and book chapters, follow the examples below:

Dupont B. Bone marrow transplantation in severe combined immunodeficiency with an unrelated MLC compatible donor. In: White JJ, Smith R, eds. Proceedings of the third annual meet-

3. Units of Measurement

All measurements should be listed in SI units. Older conventions may be
used after the SI units but should be placed in parentheses.

4. Abbreviations and Symbols

With the exception of units of measurement, the JNM discourages the
use of abbreviations. For additional information on proper medical abbrevia-
time an abbreviation is used, it should be preceded by the full word or name of
the term being abbreviated.

5. Tables

Type each table double-spaced on a separate page. Do not submit tables as
graphs.

Tables should be self-explanatory and should supplement, not duplicate,
the text. Each table must be cited in consecutive numerical order in the text.
Number the tables consecutively with an Arabic number following the word
"TABLE." The titles should be descriptive, brief, and typed centered in upper-
and lower-case letters. Place horizontal rules below the title, column headings,
and at the end of the table. Do not use vertical lines. Give each column a short or abbreviated heading.

Place explanatory matter in footnotes, not in the heading. Use the follow-
ing symbols in this sequence: *, †, ‡, §, ¶, **. Expand in the footnote all non-
standard abbreviations used in each table. For footnotes, identify statistical
measures and variations, such as standard deviation and standard error of the
mean. If data from another published source are used, obtain written per-
mission from the publisher of the original source and acknowledge fully. If
data from an unpublished source are used, obtain permission from the prin-
cipal investigator and acknowledge fully.

6. Illustrations

Illustrations should clarify and augment the text. Because imaging is a
major aspect of nuclear medicine, the selection of sharp, high-quality illus-
trations is of paramount importance. Figures of inferior quality will be
returned to the author for correction or replacement.

Submit four complete sets of glossy illustrations, no smaller than 3½ × 5
in. nor larger than 8 × 10 in. Do not send original artwork. Glossy photo-
graphs of line drawings rendered professionally on white drawing paper in
black India ink, with template or typewritten lettering, should be submitted. No
drawn drawings or typewritten art will be accepted. Letters, numbers, and symbols
(typewritten or template) must be clear and of sufficient size to retain legibility
after reduction.

Each illustration must be numbered and cited in consecutive order in the
illustrations should be identified on a gummed label affixed to the back of
each illustration and contain the following information: figure number, part
of figure (if more than one), senior author’s name, and designation of “top.”

Color illustrations will be considered for publication, but the author is
responsible for all charges relating to separations and printing. An estimate
of these charges will be sent to the author at the time of production. Author
approval of charges is required before production will continue. Additionally,
authors may incur charges for corrections to black and white images (e.g.
resetting labels and symbols, ganging multipart images as one image). Four
copies of glossy color photographs (not transparencies) must be submit-
ted for review. Polaroid prints are not acceptable. All submitted illustra-
tions become the property of The Society of Nuclear Medicine and will not be
returned unless the manuscript is rejected.

7. Legends for Illustrations

Legends for illustrations should be concise and should not repeat the text.
Legends should be typed double-spaced on a separate page. Each figure
should be cited in consecutive numerical order in the text. Number the fig-
ures with an Arabic number following the word "FIGURE." Use letters to desig-
nate parts of illustrations (e.g., A, B, C) and describe each part clearly in the
legend. Any letter designations or arrows appearing on the illustration
should be identified and described fully.

Original (not previously published) illustrations are preferred for publi-
cation in the Journal; however, if illustrations have been published previ-
ously, authors are responsible for obtaining written permission from the pub-
lisher to reprint. The source of the original material must be cited in the
references and the following credit line in parentheses included in the legend:
"Reprinted with permission of Ref. X." All permission releases must be sub-
mitted to the Editor at the time of manuscript submission.

F. Acknowledgments

Acknowledge persons or agencies contributing substantially to the work,
including any grant support.

V. MANUSCRIPT CHECKLIST

Original double-spaced typed manuscript and three copies.

Copyright transfer.

Title page with title, author’s names and complete affiliations;
complete address, telephone number and fax number for corre-
sponding author, complete address of author for reprint requests.

Structured abstract (maximum 150 words) and key words.

References in consecutive numerical order. Reference list typed
double-spaced.

Figures and tables in consecutive numerical order.

Legends for all figures, typed double-spaced.

Consent forms for patient photographs.

Written permission from the publisher to reprint previously pub-
lished figures and tables.
