cinoma are presented along with new developments in chemotherapy.

Tumors of the gastrointestinal system receive much more coverage in this new edition. Adjunctive radiation for colo-rectal carcinoma is carefully reviewed, and for the first time, the role of radiation therapy in tumors of the pancreas, biliary tract, and gallbladder are discussed. The chapters on cervical and uterine malignancy are classics in the oncology literature. Carcinoma of the vagina, however, is not discussed. Although a less common

tumor, the major contribution of radiation techniques to this area warrants discussion.

This comprehensive text continues to be mandatory reading for radiation oncologists and is an excellent reference for all physicians who manage patients with cancer.

## SNM ANNUAL MEETING PLACEMENT SERVICE

The Society of Nuclear Medicine Annual Meeting Placement Service is accepting applications from employers and job seekers.

Applications for the following positions will be accepted: Nuclear Medicine Physician, Scientist, and Technologist. Applications from employers with openings in these fields will also be accepted. The Placement Service is designed to bring prospective employees and employers together through personal interviews. The Service does not enter into employment negotiations, leaving all such matters to employers and employees.

It is expected that all employers using the SNM Placement Service will be equal opportunity employers and wish to receive applications from qualified persons regardless of their age, national origin, race, religion, sex, or handicap.

The Annual Meeting Placement Service is open to SNM members for \$5.00, to nonmembers for \$15.00, and to employers for \$25.00.

Applications may be obtained from the Placement Bureau, which will be located in Cobo Hall, room 3043 in Detroit, Michigan, June 24-27, 1980 or by writing:

Placement Service Society of Nuclear Medicine 475 Park Avenue South New York, NY 10016

## **BOOKS RECEIVED**

The Physics of Medical Imaging: Recording System Measurements and Techniques. Arthur G. Haus, Ed. 613 pp, illustrated. American Institute of Physics, 1979, \$35.00 (\$25.00 for AAPM members).

Radiation Protection—Concepts and Trade Offs. Hymer L. Friedell, 38 pp. NCRP Publications, 1979, \$7.00

NCRP Report No. 63. Tritium and Other Radionuclide Labeled Organic Compounds Incorporated in Genetic Material. 147 pp, NCRP Publications, 1979, \$7.00

Cardiac Nuclear Medicine. B.L. Holman, H.L. Abrams, E. Zeitler, Ed. 88pp, illustrated. New York, Springer-Verlag, 1979, \$19.00

Pathology of Soft Tissue Tumors. Steven I. Hajdu, 574 pp, illustrated, Lea & Febiger, 1979, \$65.00
