

In Appreciation of JNM's Reviewers

With the completion of the thirty-fifth volume of *The Journal of Nuclear Medicine*, it is appropriate to recognize the efforts of our referees. We are indebted to them for volunteering their time and energies to evaluate manuscripts submitted to the *Journal*. In addition to appraising the scientific merit of individual manuscripts, many of our reviewers make a special effort to offer advice to authors to improve the usefulness and presentation of their manuscripts, thus enhancing the quality of articles appearing in the *Journal*. Below is a list of over 600 people who contributed to the peer-review effort of the *Journal* in 1994. We are grateful for their essential contribution.
