

In Appreciation of Reviewers for *The Journal of Nuclear Medicine*

This issue marks the completion of the 37th volume of *The Journal of Nuclear Medicine*. I want to take this opportunity to thank the approximately 600 people who have assisted in the process by their contribution of time and energy as reviewers of the scientific manuscripts submitted to the *Journal*. Each manuscript received is reviewed by at least two of these outstanding individuals who have conscientiously read manuscripts and provided comments to the editor which are helpful in deciding on whether or not to accept it. Perhaps even more notable are their efforts to provide comments and suggestions to the authors to improve their manuscript so that the quality of the revised, accepted version best presents the author's work and is worthy of publication in the *Journal*. To our reviewers, therefore, a hearty and most sincere "thank you". On behalf of the readership, we are most appreciative of your contribution.
