INFORMATION FOR AUTHORS

The Journal of Nuclear Medicine will consider original articles in the following areas: basic sciences, in vivo function studies, in vitro studies, radionuclide imaging clinical applications, and therapeutic applications. Articles in which the radiolabeled component is an article submitted must be marked at the top of each manuscript. Articles must describe both diagnostic and original studies which are completely documented by both references and the literature and description of the techniques used. Articles are accepted for publication on the condition that they are contributed exclusively to this journal. Authors alone are responsible for the technical accuracy of their manuscripts. Material submitted should follow the style outlined in the Style Manual for Authors available from the Society of Nuclear Medicine.

In addition to regular full-length articles, the Journal will consider manuscripts in the following areas:

- Preliminary Notes: Reports communicating information about "works in progress." The text may not exceed 1,200 words. Authors may submit (A) two illustrations, (B) two tables, or (C) one table and one illustration. An additional 400 words of text may be submitted if no illustrations or tables are required.

- Case Reports: Short, definitive articles of completed research. They must not describe work that will be published in full detail later or be a portion of a study being reported in several short papers. Concise Communications must be submitted with no errors and must conform exactly to the instructions for style of manuscripts. If accepted, they will be given more rapid publication than longer articles. Concise Communications must not exceed ten double-spaced typewritten pages including text, tables, figures, captions, and references. Each figure with its accompanying caption will be counted as one-half of a manuscript page.

- Letters to the Editor: Comments on material previously published in the Journal. They are opinions of limited but immediate interest in relation to the "state of the art."

In preparing manuscripts for submission, please note the following:

- Manuscripts must be typed double spaced, except for captions of illustrations. The original must be typed on separate sheets of bond paper, numbered consecutively with Arabic numerals, and have titles (in caps) centered. Make titles descriptive and provide headings for all columns. Omit vertical lines. Place horizontal lines under titles and under headings.

- Illustrations must be submitted in photographic form (glossy prints) or as original ink or ink drawings. Frehand lettering is not acceptable. Two sets of illustrations must be submitted. Labeling should be clear, set in initial caps and lower case. Poor-quality illustrations will be returned to the author to be redone because good reproduction is essential for clarity of presentation. Illustrations should be identified by a label pasted on the back (do not write on the back of photographs with pen or pencil) indicating number, author's name, and an abbreviated article title. The top of each illustration must be clearly marked. Descriptive legends with sufficient detail to make illustrations understandable, without reference to text, should be grouped on a separate sheet double-spaced. Authors will be charged $10 apiece for every illustration over four.

- References must be cited in the text by number (underlined) in parenthesis in order of appearance. A consecutive list according to reference number must be submitted on a separate page double-spaced. Literature references must be cited in the following order: name of author (last name first, then initials with no punctuation), title of article (in caps and lower case), title of journal, volume number, first and last page of article, year of publication. If more than three authors, the third author will be designated "et al." Example: Poe ND, Doré EK, Swanson LA, et al: Misinterpretation of lung scans in the diagnosis of pulmonary embolism. J Nucl Med 8: 345-362, 1967. For books, the order is the following: author's last name with initial(s); Title of book underlined in caps and lower case. City of publication, publisher, year of publication. Example: Berner E: Principles of Nuclear Medicine, New York, Oxford University Press, 1966, p. 26. Chapters in books will be treated as journal articles with regard to capitalization.

EDITORIAL COMMUNICATIONS: All editorial correspondence should be sent to the Editor, Frank H. DeLand, M.D., University of Kentucky Medical Center, Medical Annex #5, Lexington, KY 40506; Phone: (606) 254-1803. Books and monographs covering the use of nuclear phenomena in the diagnosis and treatment of disease and allied fields will be reviewed as space is available. Send copies to the Editor at the address above.

BUSINESS COMMUNICATIONS: Send all correspondence concerning business (advertising, subscriptions, change of address, etc.) to the publisher, Society of Nuclear Medicine, 475 Park Ave, South, New York, NY 10016; Phone: (212) 889-0717. Advertising rates are available from the publisher. Advertising is accepted subject to approval by an editorial committee. Forms close on the first of the month preceding date of issue.
