

**MISSOURI VALLEY CHAPTER
SOCIETY OF NUCLEAR MEDICINE
ANNUAL MEETING
Practical Advances in Nuclear Medicine**

October 3-5, 1980

Sheraton West Port Inn

St. Louis, Missouri

The Missouri Valley Chapter of the Society of Nuclear Medicine announces its annual meeting to be held October 3-5, 1980 at the Sheraton West Port Inn, 191 West Port Plaza, St. Louis, Missouri.

The program will include continuing education courses covering various practical advances in Nuclear Medicine such as tomographic imaging, hepatobiliary imaging, platelet and leucocyte labeling and imaging and pediatric cardiovascular nuclear medicine. AMA category 1 credit for physicians and VOICE credit for technologists has been applied for.

CALL FOR ABSTRACTS

There will be a presentation of contributed papers. Oral presentation should be no more than 10 minutes. Send 200 word abstracts to:

James W. Fletcher, M.D.
Chief, Nuclear Medicine 115JC
St. Louis Veterans Administration Hospital
John Cochran Division
St. Louis, MO 63125

The Young Investigator Award will be given to the author of the best paper presented by a young investigator or a technologist. Two additional awards will be given to the runners-up. Papers will be judged on quality of presentation, visual aids, and subject matter. Only MVC members are eligible for the award but anyone is welcome to submit abstracts.

Deadline September 1, 1980.

For further information contact James W. Fletcher at the above address.

AUDIOVISUALS IN NUCLEAR CARDIOLOGY

The following new audiovisual kits are now available:

- SI-18 **Basic Concepts in Cardiac Anatomy and Physiology** by Glen W. Hamilton, M.D.
- SI-19 **The Measurement of Ejection Fraction** by William Ashburn, M.D.
- SI-20 **Intracardiac Shunts and Cardiac Output** by William Ashburn, M.D.
- SI-21 **Perfusion Studies of the Ischemic Heart** by Glen W. Hamilton, M.D.
- SI-22 **Detection of Acute Myocardial Infarction** by B. Leonard Holman, M.D.
- SI-23 **Instrumentation for Nuclear Cardiology** by Trevor D. Craddock, Ph.D.

Each Audiovisual kit comes complete with expert narration and carefully selected supporting visual materials. Consisting of 35 mm color slides and standard audio cassette, each kit forms a complete self-teaching package. Suitable for individual or group instruction, these units offer active learner participation to reinforce the most important concepts. Each kit has been prepared by an authority in the field, making expert instruction available to you in your home, office or hospital.

SNM Audiovisuals cost \$55.00 each for members of the Society of Nuclear Medicine, \$75.00 each for nonmembers. **There is a 10% discount if all six nuclear cardiology units are ordered at once.** A complete list of SNM Audiovisuals is available on request.

The Journal of Nuclear Medicine INFORMATION FOR AUTHORS

Editorial Policy. *The Journal of Nuclear Medicine* publishes several types of original articles: full length articles, concise communications, preliminary notes, case reports, technical notes, letters to the editor, editorials, and solicited articles of general medical interest. It is understood that manuscripts submitted for consideration are original, including illustrations and tables, and that the material submitted is not under consideration by another publication.

Copyright. In compliance with the copyright Act of 1976, effective January 1, 1978, the following written statement must accompany all submissions to be considered for publication. "Upon acceptance by the *Journal of Nuclear Medicine* all copyright ownership of the article (complete title of the article in this space), is transferred to the Society of Nuclear Medicine. On behalf of any and all coauthors I accept the responsibility for release of any part or all of the material contained within the article noted above. The undersigned stipulates that the material submitted to *The Journal of Nuclear Medicine* is original and has not been submitted to another publication for concurrent consideration."

Review Procedure. Submitted manuscripts are reviewed for content on the basis of originality, significance, adequacy of documentation, reader interest, and composition. All manuscripts are reviewed by two referees and the editorial staff. All accepted manuscripts are subject to editorial revisions for scientific accuracy and for clarity in the office of the editor. Before processing for publication, edited manuscripts are returned to the author(s) for approval. This procedure obviates the need for galley changes other than typographical errors.

Manuscript Format—General Information—An original and two copies of the manuscript with two sets of *unmounted* illustrations (glossies, preferably 5" X 7") should be sent with a transmittal letter to the Editor.

1. Every typewritten page must be double-spaced, including title page, abstract, text, references, legends, acknowledgments, and footnotes.
2. There should be a 2-in. margin on all sides of typewritten pages.
3. Reference numbers should be underlined and in parentheses in the text.
4. Paragraphs should begin with an indentation of at least five spaces.
5. All pages should be numbered at the top right-hand side *without* names of the author(s) or title of the article.
6. Handwritten changes are not acceptable.
7. Papers must be written in English.
8. References in the text should not be made to institutions or locales except when mention of the institution, locale, or facility is germane to that particular article.
9. Generic names should be used. Manufacturers of instruments or radiopharmaceuticals should not be named in the manuscript unless their inclusion is absolutely essential to the content. When necessary, however, manufacturers should be identified by footnotes. Consecutive order of footnote symbols is: *, †, ‡.

Title Page. The title should be as short as possible, with a maximum of 72 characters, including spaces. The first names and degrees of all authors, the name and address of the department and institution where the work was done, sources of support (if applicable), and name and address of author responsible for correspondence and reprints should be included on the title page.

Abstract. Abstracts must be limited to 150 words or less, typed on a separate page. Three to seven key words should be included for indexing.

References. References must be typed double space on a separate sheet and numbered consecutively as they appear in the text. References included in a table or illustration are also numbered sequentially with those in the text. The Journal uses the *Index Medicus* style for references. When more than three authors are listed, the additional authors are listed as "et al." Journal names are abbreviated according to the *List of Journals Indexed in Index Medicus*.

Sample references are:

1. Bardy A, Fouye H, Gobin R, et al: Technetium-99m labeling by means of stannous pyrophosphate: Application to bleomycin and red blood cells. *J Nucl Med* 16: 435-437, 1975
2. Berne E: *Principles of Group Treatment*, New York, Oxford University Press, 1966, pp 26-28
3. Brownell GL: Theory of radioisotope scanning. In *Medical Radioisotope Scanning*, vol 1. Vienna, IAEA, 1964, pp 1-10
4. Cloutier RJ, Edwards CL, Snyder WS, eds: *Medical Radionuclides: Radiation Dose and Effects*, AEC Symposium Series 20, CONF-601212, Oak Ridge, TN, 1970
5. Pollock, BE: Effect of carbon arc radiation on cardiac output in dogs, PhD Thesis, Tulane University Medical School, New Orleans, 1953
6. Snyder WS, Ford MR: A dosimetric study for the administration of Neohydrin labeled with ²⁰³Hg and ¹⁹⁷Hg. In *Health Physics Division Annual Progress Report*, Oak Ridge, TN, ORNL 4168, July 31, 1967, pp 267-273
7. Brown HS, Gray CT: New traces in old spaces. *J Nucl Med*: in press

Numbered references to personal communications, unpublished data, manuscripts in preparation, or manuscripts submitted for publication are not acceptable.

Tables. A table is a condensation of related data or facts arranged in columns. Tables should be self-explanatory and should supplement, not duplicate, the text. Each table must be referred to in numerical order in the text. Each table must be typed on a separate sheet of paper; tables should be numbered consecutively with arabic numerals and have titles centered in capital letters. They are placed after the references in the manuscripts. The titles should be descriptive and as brief as possible. (Explanatory material should be included in footnotes or the text.) Place horizontal lines above the title, under the title, under column headings, and at the end of the table. Omit all vertical rules.

Illustrations. Since imaging is one of the major aspects of nuclear medicine, the selection of high-quality illustrations is of paramount importance. Arrows, lettering, and numbers added to figures must be of professional quality. Original line graphs are preferred for optimal reproduction. Figures of inferior quality or damaged figures as well as those poorly designed or badly lettered will be returned to the author for correction, replacement, or deletion, if indicated. A legend page with descriptive paragraphs for each figure, typed in numerical order with the abbreviation "FIG.:" preceding each arabic number must be included. Every figure should be identified clearly in the text in numerical order. If the manuscript includes illustrations that have been published previously, permission to reproduce them must be obtained by the author from both the original author and from the original publisher and sent to *The Journal of Nuclear Medicine*. In the submitted manuscript the original publication must be cited in the references, and the following must appear in the figure legend: (reprinted by permission of Ref. X).

Units and Abbreviations. Nomenclature, units, and abbreviations should conform to IUPAC recommendations and Systems Internationale (SI). Chemical formulae follow the recommendations of the American Chemical Society.

Manuscripts should be submitted to: Frank H. DeLand, M.D., Editor, *The Journal of Nuclear Medicine*, University of Kentucky Medical Center, Medical Annex #5, Lexington, KY 40506.
