

Misplaced Hydroxyl Group in Figure

TO THE EDITOR: In the article entitled "The Synthesis of 2-[F-18] Fluoro-2-Deoxy-D-Glucose Using Glycols: A Re-examination," Vol. 25, December 1984, pp 1327-1334, please note the following correction:

On p. 1329, Figure 1 should appear as shown. As you will

note in this figure, as compared to that originally published, the error concerned the consistent placement of the hydroxyl (OH) group at carbon-3 in the appropriate equatorial position.
