Supporting data

Supporting data may be submitted if, in the opinion of the contributor, the reader's understanding will be enhanced. Supporting data are not required, however, if submitted, supporting data must be limited to one page and stapled to each of the photocopies of the abstract to ensure that each reviewer has all of the information available.

Format for title and body

USE ALL CAPS for TITLE. Use **initials, rather than full spelling, for authors' first and middle names**. Single space all typing, but leave a space between the title block and the body of the text. Indent each paragraph three spaces. Do not indent title. Draw special symbols in black India ink.

Make title brief, clearly indicating the nature of the investigation. Then state authors' names and institutional affiliation. Omit degrees, titles, institutional appointments, street address, and zip code.

Organization of body of abstract

Organize the body of the abstract as follows:

A statement of the purpose of the study (preferably one sentence).

A statement of the methods used.

A summary of the results presented in sufficient detail to support the conclusions.

A statement of the conclusions reached. It is not satisfactory to state, "The results will be discussed" or "other data will be presented", unless a scientific exhibit is being submitted.

Do not use subtitles, e.g., Methods, Results.

IMPORTANT

All abstracts accepted for the program will be considered for publication. To ensure quality printing, the instructions must be followed completely for all abstracts. Abstracts that do not conform will be either retyped by the publisher at a cost of \$40.00 to the author or will not be printed.
