

radionuclides leads to proposals for dedicated facility. *J Nucl Med* 1987; 28:1371-1378.

Robert W. Atcher  
*Argonne National Laboratory*  
*Argonne, Illinois*

**REPLY:** I'd like to thank Dr. Atcher for informing journal readers about the radionuclide production facility at the Argonne National Laboratory. With respect to the Superconducting Super-Collider (SSC), *Business Week* ran an article on September 14, 1987 (p. 36), that stated: "Physicists are convinced that SSC is crucial to providing clues to the origin of the universe and that it will produce advances in nuclear medicine, fusion energy, and electronics." The SSC should be

portrayed as an opportunity as well as a threat for nuclear medicine research and radionuclide production.
