
Erratum

In the abstract, the sentence regarding peak corporal rates should read: Peak corporal rates corrected for outflow (r = 0.88) and uncorrected for outflow (r = 0.91) and change in volume over 2 min centered around peak flow (r = 0.96) all correlated with angiography.

In Table 3, PCIF (ml/min) for normals is ≥ 20 not ≥ 2.0.

In the reprints contact line, the institution is Stevens Memorial Hospital in Edmonds, WA.
