

SNM Procedure Guidelines Manual Available

The Commission on Health Care Policy and Practices (CHCPP) Guidelines and Communications Committee has published the Society of Nuclear Medicine (SNM) Procedure Guidelines Manual 1997. The manual contains the 26 procedure guidelines approved by the SNM House of Delegates. Anyone who would like a copy of this publication may contact Olivia Wong at owong@snm.org. The cost

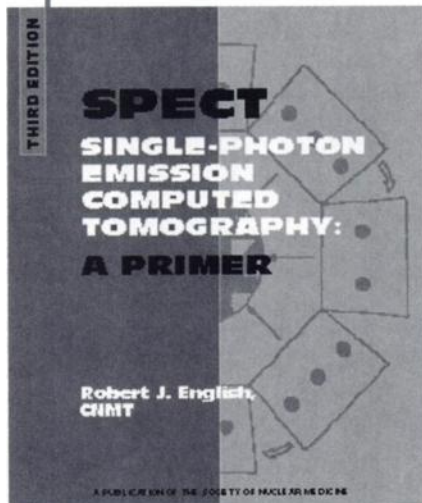

of the Procedure Guidelines Manual is \$20.00.

SNM Archives Established

Dennis D. Patton, MD, Society of Nuclear Medicine (SNM) historian, established the SNM archives at the Society's headquarters in Reston, VA. Patton worked with Dr. Nancy Knight, a consulting historian, to organize and catalog the papers of the late Michael Ter-Pogossian. The Ter-Pogossian collection was generously donated by his widow, Ann, and fills 15 numbered and labeled boxes in the new SNM

archives room. The collection's contents are listed in the SNM computer for the convenience of scholars doing historical research. The next addition will be the massive collection of Marshall Bruzer's papers, books and other material, donated to the Society by Pat Bruzer. In addition to the archives room, there will be a display room, near the SNM reception desk, that will hold books, journals and rotating exhibits. Anyone wishing to donate historical material to the SNM archives should contact Dennis Patton, MD, SNM historian, at (520) 626-7709 or via e-mail at dpatton@radiology.arizona.edu.

It's Here!

The new, third edition of the widely popular SPECT: A Primer is now available from Matthews Medical Books at the toll-free number below.

Substantially updated and expanded throughout, the third edition includes even more basic information essential to the technologist working in day-to-day clinical settings.

The new *SPECT Primer* features an enhanced section on Clinical Applications, incorporating the latest and most widely accepted fundamental knowledge in the field, with, three all-new chapters on Acquisition Devices, Processing Devices, and Clinical Indications. And in every chapter, you'll find expanded material to help nuclear medicine professionals who use SPECT perform at peak.

Whether you're a working technologist, teacher, or student, the new edition of *SPECT: A Primer* is a must for your clinical library. No other text available brings together—clearly and authoritatively—the essential information you need to understand and use Single Photon Emission Computerized Tomography.

Call toll-free to order your copy today—\$30.00 members/\$40.00 nonmembers.
Matthews Medical Books • 800-633-2665 • (Non-U.S., call 314-432-1401)

The *new SPECT Primer* and the *new Review of Nuclear Medicine Technology* will be on sale at the SNM Publications Booth during the Annual Meeting in Denver.
