Gentlemen:

You are invited to visit Cleveland and scan some phantoms with our 5-inch crystal Radioisotope Scanner.

When we introduced 5-inch and 8-inch crystal scanners three years ago, they were intended for research programs. However, they made high resolution scans so rapidly that they soon began to be used very successfully for clinical studies.

Consequently, those who are considering the purchase of a clinical radioisotope scanner should investigate and compare ours with the others available. We believe you will be glad you did.

Sincerely yours,

D. W. Steel
President
