

### **Special Announcement**

It is the policy of the Editorial Board to pay for the preparation of engravings for the first four illustrations that are included within a manuscript. Those containing more than four are temporarily deferred to provide the author with an opportunity to either limit the number to four, or to indicate either the author's or an institutions willingness to pay for the cost involved in excess of our allowance.

The cost involved is \$7.00 per extra illustration. Previously, we have sent letters to those authors with extra illustrations, but with this announcement in the journal, only a postcard will be sent with the extra cost marked. It will be assumed that this extra cost will be borne by the author or institution unless otherwise specifically stated otherwise.

The author may be billed with his reprint order or under separate invoice.

**Southeastern Chapter  
The Society of Nuclear Medicine**

July 23, 1965

Dear Sam: In case you have not already been contacted, the Sixth Annual Meeting of the Southeastern Chapter, Society of Nuclear Medicine will be held October 22-23, 1965 at the Peabody Hotel, Memphis, Tennessee.

Requests for information about the meeting should be directed to the Local Arrangements Chairman:

Carl E. Nurnberger, Ph.D.  
Department of Radiology  
Baptist Memorial Hospital  
Memphis, Tennessee 38103

Anyone who is interested in submitting an abstract to be considered for presentation at the meeting should immediately contact:

John R. McLaren, M.D., Co-Chairman  
Scientific Program Committee  
Southeastern Chapter  
The Society of Nuclear Medicine  
c/o Emory University Clinic  
Atlanta, Georgia 30322.

**University of Pittsburgh**

**Postgraduate Course**

**Advances in Radioactive Scanning**

**Penn Sheraton Hotel**

**October 21-22, 1965**

The course director is Yen Wang, M.D., D.Sc.(MED.), associate professor of radiology at the Presbyterian-University Hospital, University of Pittsburgh.

The course will include a discussion by a guest faculty of outstanding repute on the current methods of dynamic scanning and their clinical application. There will be ample time for informal discussion and consultation. Special emphasis will be placed on rapid scintillation scanning, the use of the scintillation camera and image scanning.

Further information may be obtained from Dr. Campbell Moses, Director of Postgraduate Medicine, University of Pittsburgh School of Medicine, Pennsylvania 15213.
