

SUPPLEMENTAL FIGURE 1. Three-dimensional rendering of ^{18}F -FHBG PET/CT image of nude mouse 35 d after intracardiac injection of 1.5×10^6 A375M-3F cells. ^{18}F -FHBG PET data are displayed in yellow-red, and CT data in gray scale. This representation allows assessment of tumor burden on single image with presence of appropriate anatomic landmarks. See the accompanying supplemental video for a rotating representation.
