

Supplemental Data

Supplemental Figure 1. Modified Lassen plot of $[^{11}\text{C}]$ carfentanil PET data. Nucleus accumbens region was excluded because it lies distant from the line of regression. Filled-black point means same monkey.

Supplemental Table 1. Estimated parameters of one- and two-site binding model. Each region's specific binding at KOR (BP_{NDr}^{KOR}) and MOR (BP_{NDr}^{MOR}) and shared the effective doses of LY2795050 to achieve 50 % occupancy at KOR (ED_{50}^{KOR}) and MOR (ED_{50}^{MOR}) are shown

Two-site binding model
