

SUPPLEMENTAL TABLE 1:

Demographics of the development group. WB= Whole Body; HN = Head and Neck; SCID = Severe Combined Immunodeficiency; FTT= Failure to thrive; CGD = Chronic Granulomatous Disease. PTLD = Post Transplant Lymphoproliferative Disease.

Indication	Acquisition	Gender	Age (years)	Result of FDG PET
Fever	Brain	F	9	Non-specific findings HN regions. No other focus of infection
Polyalgias	Brain	F	17	Normal study
Fever	Brain	M	3	Non-specific findings HN regions. No other focus of infection
Lymphoma	HN	M	5	Burkitt lymphoma bones, kidneys, upper abdomen
Lymphoma	HN	F	12	B cell lymphoma of bone
Lymphoma	HN	F	10	T cell lymphoblastic lymphoma stage IV
Neck Pain	Brain	M	16	Normal study
Infection	Brain	M	18	Prior treated LAL. Non-specific findings HN regions.
Lymphadenopathy	HN	M	6	HN infection/inflammation
Polyalgias	Brain	F	10	Normal study
Lymphoma	HN	M	3	T cell lymphoblastic lymphoma stage IV
Neoplasm	HN	M	17	Eosinophilic granuloma T11
Lymphadenopathy	HN	M	11	Cervical Rosai Dorfman
Lymphadenopathy	HN	F	8	Normal study
Lymphoma	HN	M	16	Hodgkin Lymphoma stage II
Lymphoma	HN	M	9	Cervical Burkitt
Lymphadenopathy	HN	M	6	Non-specific findings HN regions. Reactive lymph nodes
Lymphadenopathy	HN	F	4	Non-specific findings HN regions. Reactive lymph nodes. Pneumonia
Lymphadenopathy	HN	F	10	Normal study
Lymphoma	HN	F	16	Hodgkin Lymphoma stage IIB
PTLD	HN	F	14	Renal transplant. No PTLD
PTLD	HN	M	7	Cardiac transplant. No PTLD
Infection	HN	F	10	Normal study
Neoplasm	HN	M	18	Langherans cell histiocytosis
FTT	WB	F	18	Non specific findings HN regions.
Lymphadenopathy	HN	F	10	Normal study
Lymphadenopathy	HN	M	14	Non-specific findings HN regions. Reactive lymph nodes
Lymphadenopathy	HN	F	7	Non-specific findings HN regions. Reactive lymph nodes
PTLD	HN	M	17	Renal transplant. Abdominal PTLD
Fever	WB	M	2	No infection
Polyalgias	HN	F	10	Normal study
Polychondritis	HN	M	2	Normal study
Lymphoma	HN	F	14	Hodgkin Lymphoma stage IV

Hypertension	Brain	F	16	Normal study
Lymphoma	HN	M	14	Hodgkin Lymphoma stage IIA
Sarcoidosis	Brain	M	9	Non evidence of sarcoidosis
Fever	WB	M	3	Non-specific findings HN regions. Reactive lymph nodes. Pneumonia
Neoplasm	WB	F	9	Osteosarcoma
FTT	WB	F	9	Non-specific findings HN regions. Reactive lymph nodes
Neoplasm	WB	F	9	Osteosarcoma
Xerostomia	WB	M	10	Normal study
Infection	WB	M	16	Sternal osteomyelitis
Lymphnodes	WB	F	2	Benign reactional lymphoproliferation
Neoplasm	HN	F	12	Ewing sarcoma
PTLD	HN	M	6	Cardiac transplant. No PTLT
Neoplasm	WB	F	2	Neuroblastoma
Abdominal pain	WB	M	8	Mesenteric adenitis
Fever	WB	F	8	Non specific findings HN regions
Neoplasm	WB	M	12	Ewing sarcoma
Infection	WB	M	10	Cervical adenitis
Neoplasm	WB	M	4	Neuroblastoma
MGC	WB	M	0,5	Pneumonia
Lymphoma	HN	F	15	Grey zone lymphoma
Fever	HN	F	16	Normal study
Lymphoma	HN	M	11	Hodgkin Lymphoma stage IIIB off treatment
Lymphoma	HN	F	4	Burkitt lymphoma
Neoplasm	WB	F	1	Mediastinal mass. No evidence of neoplasm. Likely post infection
SCID	WB	M	1	B cell lymphoma
Lymphoma	WB	F	3	Anaplastic lymphoma

SUPPLEMENTAL TABLE 2:

Demographics of the validation group. WB= Whole Body; HN = Head and Neck; ITP:

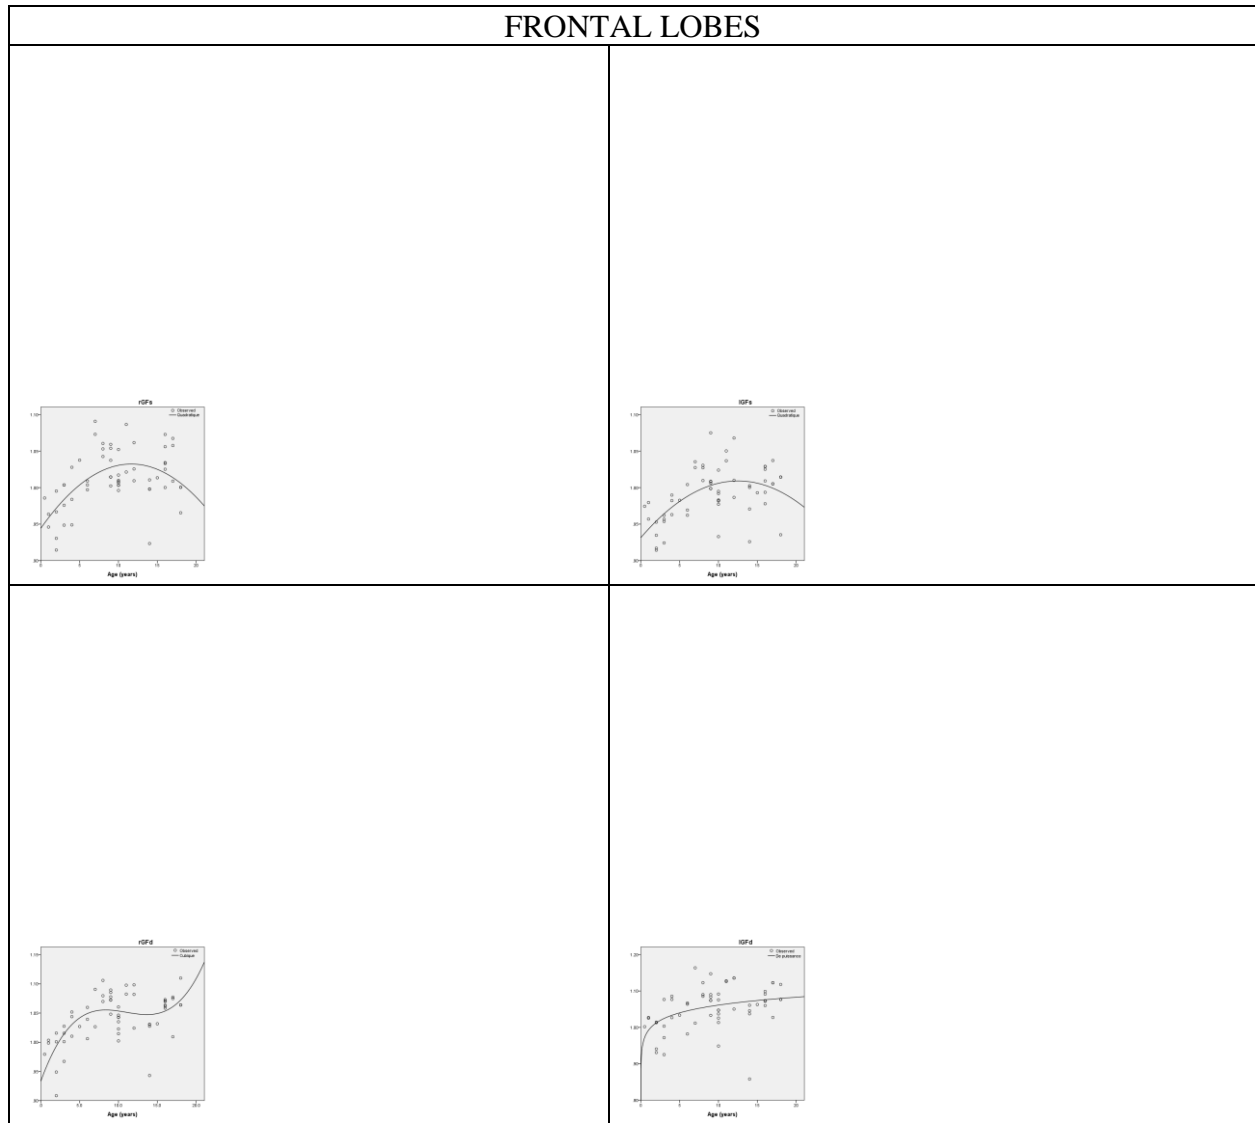

Idiopathic Thrombocytopenic Purpura; CGD = Chronic Granulomatous Disease.

Indication	Acquisition	Gender	Age (years)	Result of FDG PET
Lung inflammation	Brain	F	13	Normal study
Cutaneous anomalies	Brain	F	16	Normal study
Crohn	Brain	F	14	Duodenal ulceration
Coeliac disease	Brain	M	15	Small bowel inflammation
Neoplasm	HN	F	15	Nasopharyngeal Sarcoma
Lymphoma	HN	F	4	B cell lymphoma
Neoplasm	HN	F	13	Posterior mediastinal mass / schwannoma
PTI	WB	F	12	Non specific findings HN regions
Fever	WB	F	2	Pneumonia
Fever	WB	M	4	Non specific findings HN regions
Lymphadenopathy	HN	M	15	Benign reactional lymphoproliferation
Neoplasm	HN	F	13	Inactive mandibular mass / aneurysmal bone cyst
Lymphoma	HN	F	12	Hodkgin Lymphoma stage III A
Fever	WB	M	3	Non-specific findings HN regions. Reactive lymph nodes
Lymphoma	HN	M	11	B cell lymphoma stage I
Lymphoma	WB	F	11	Hodkgin Lymphoma stage IV-B
Lymphadenopathy	HN	M	8	Benign reactional lymphoproliferation
Fever	HN	F	18	Small bowel inflammation and lung nodules / Loeffler
Neoplasm	WB	F	14	Rhabdomyosarcoma
Polyalgias	WB	M	11	Digital soft tissue inflammation
Lymphadenopathy	WB	F	3	Normal study
CGD	WB	F	1	Pneumonia
Lymphadenopathy	HN	M	15	Benign reactional lymphoproliferation / toxoplasmosis
Neoplasm	WB	M	1	Follow sarcoma. Normal study
Polychondritis	HN	M	16	Normal study
CGD	WB	M	7	Normal study
Fever	WB	M	6	Non-specific findings HN regions. Reactive lymph nodes
Fever	WB	M	2	Non-specific findings HN regions. Reactive lymph nodes
Crohn	Brain	F	17	Non-specific findings HN regions. lymph nodes

SUPPLEMENTAL TABLE 3:

Optimal models for WBN

Quadratique = quadratic ; linéaire = linear; cubique = cubic; composé = modified power law; de puissance = power law; logarithmique = logarithm

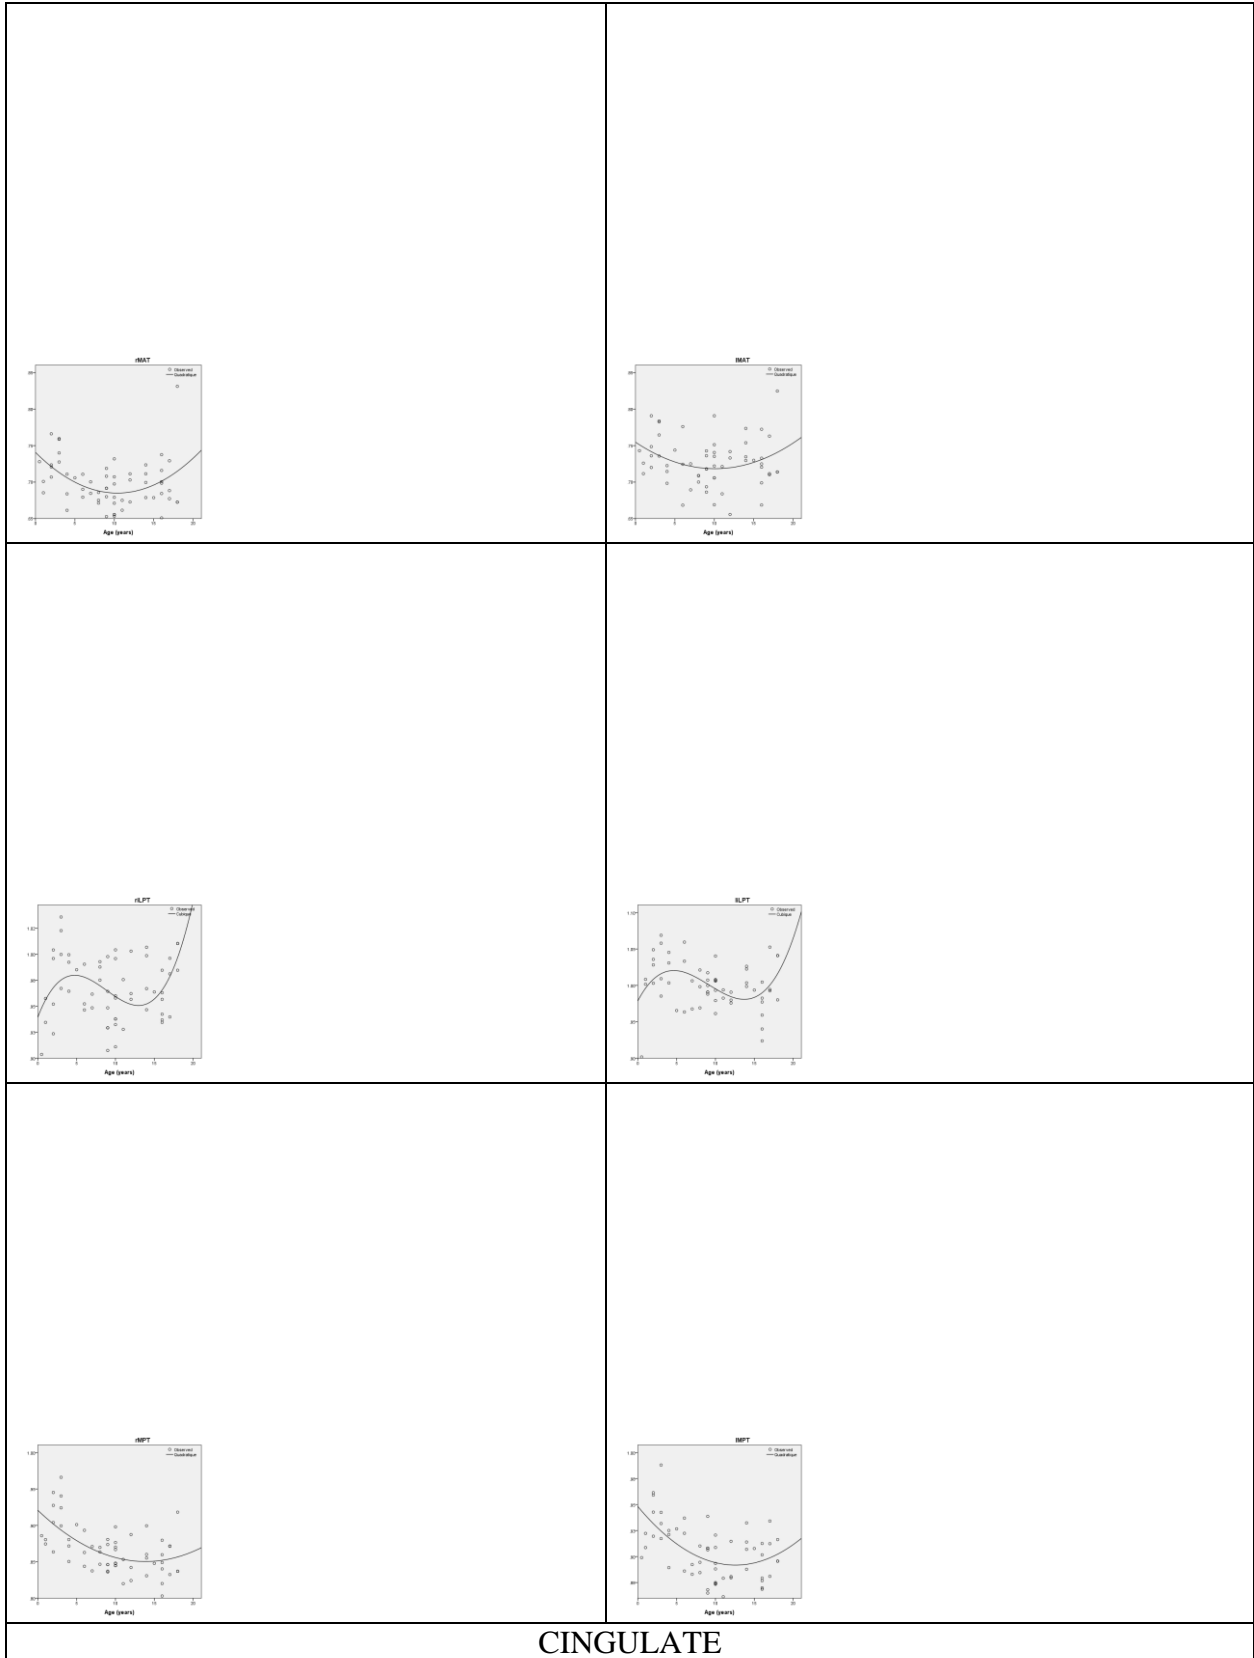

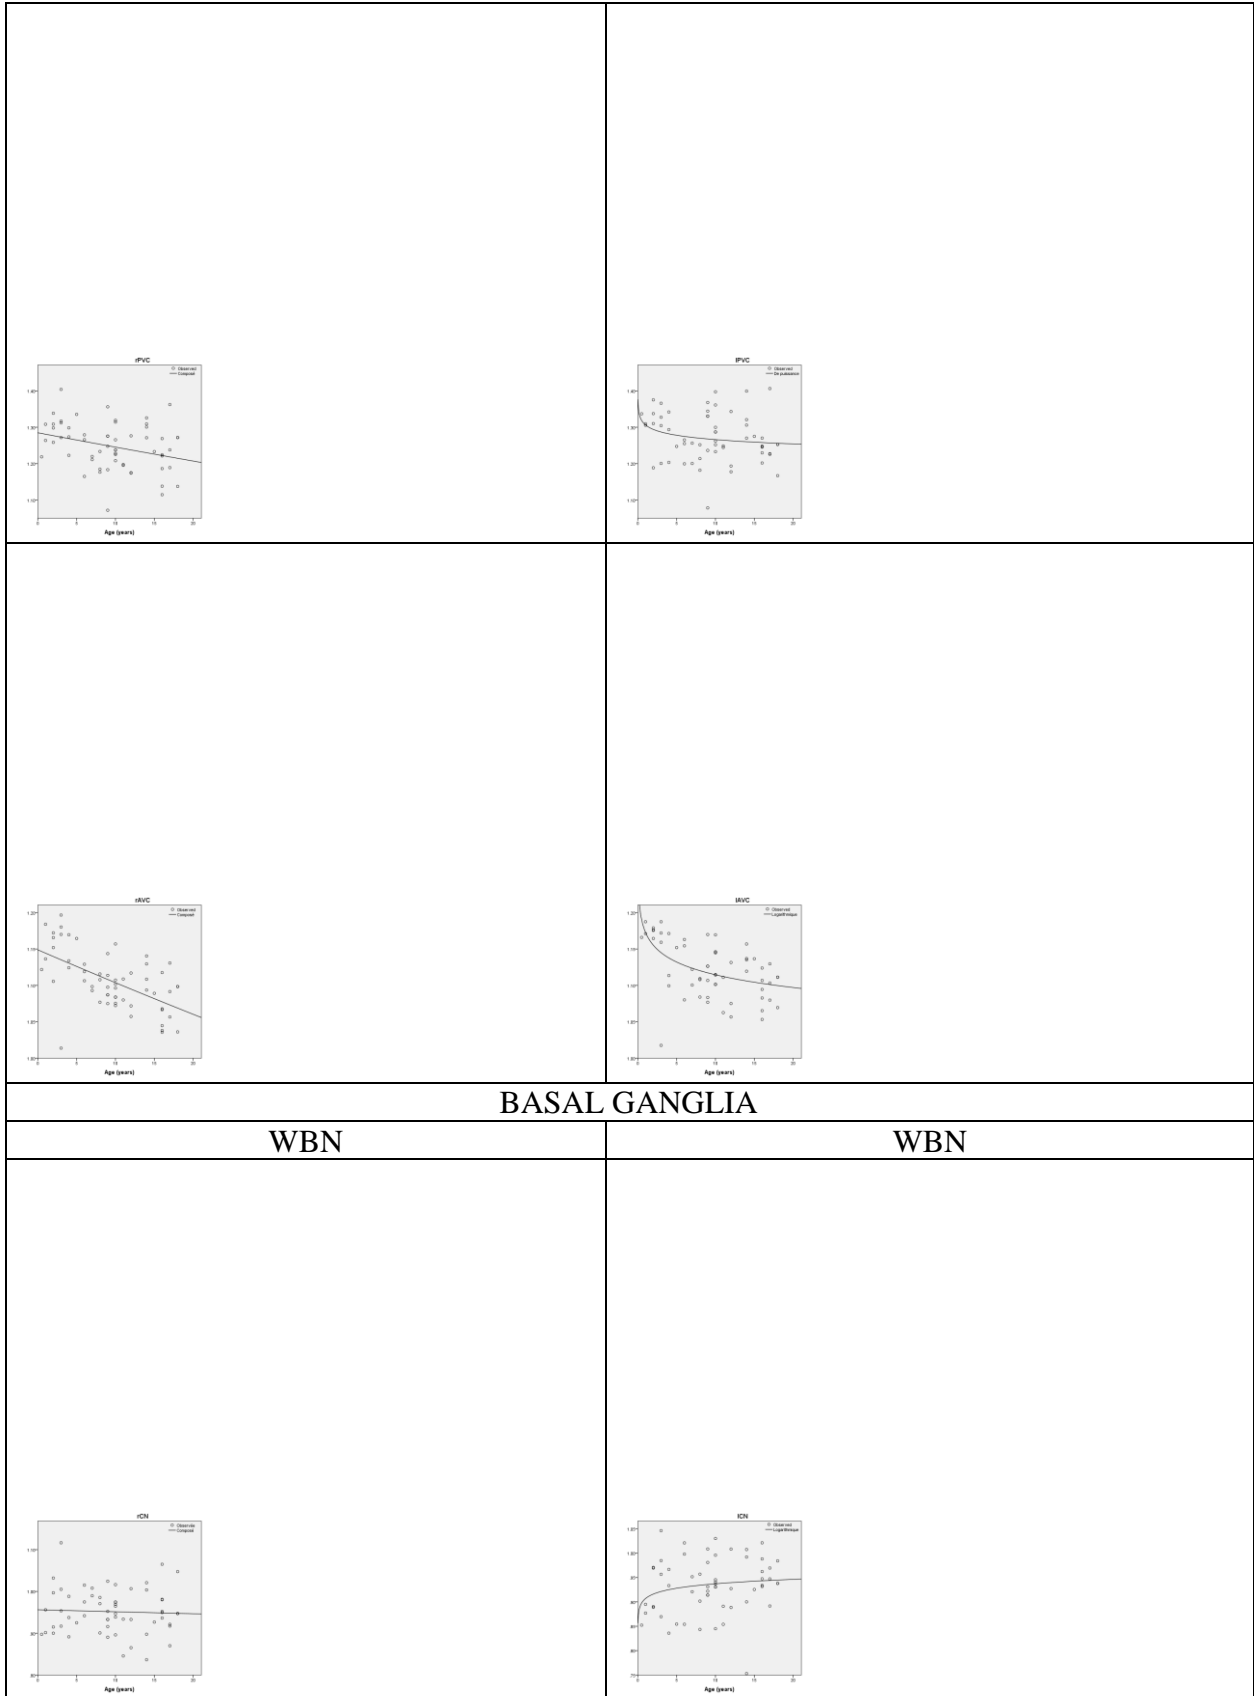

TEMPORAL LOBES

OCCIPITAL LOBES

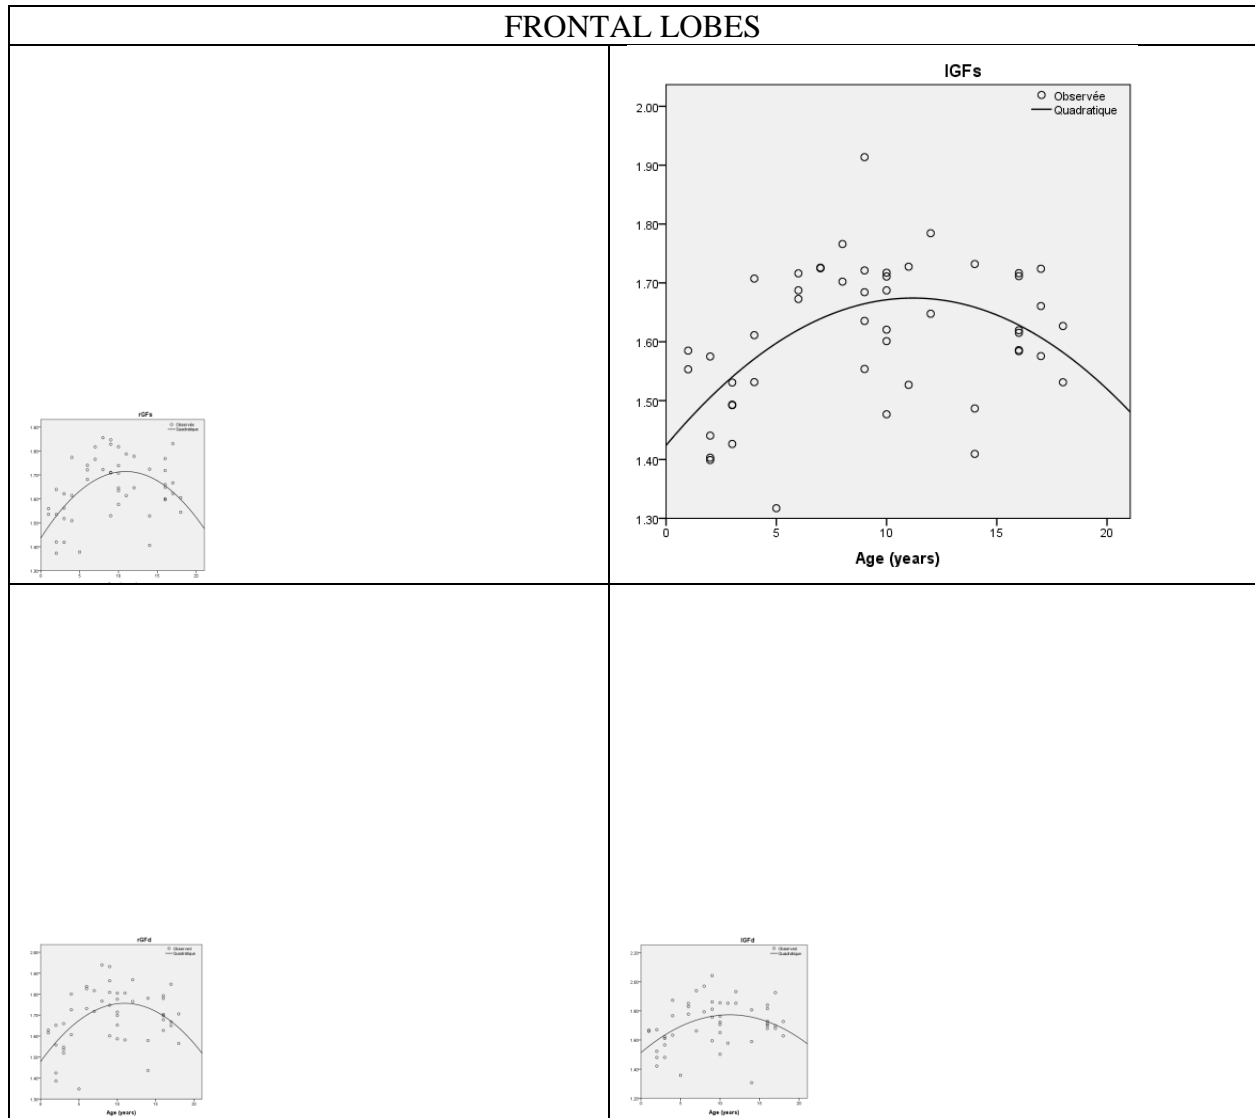

SUPPLEMENTAL TABLE 4:

Optimal models for PN

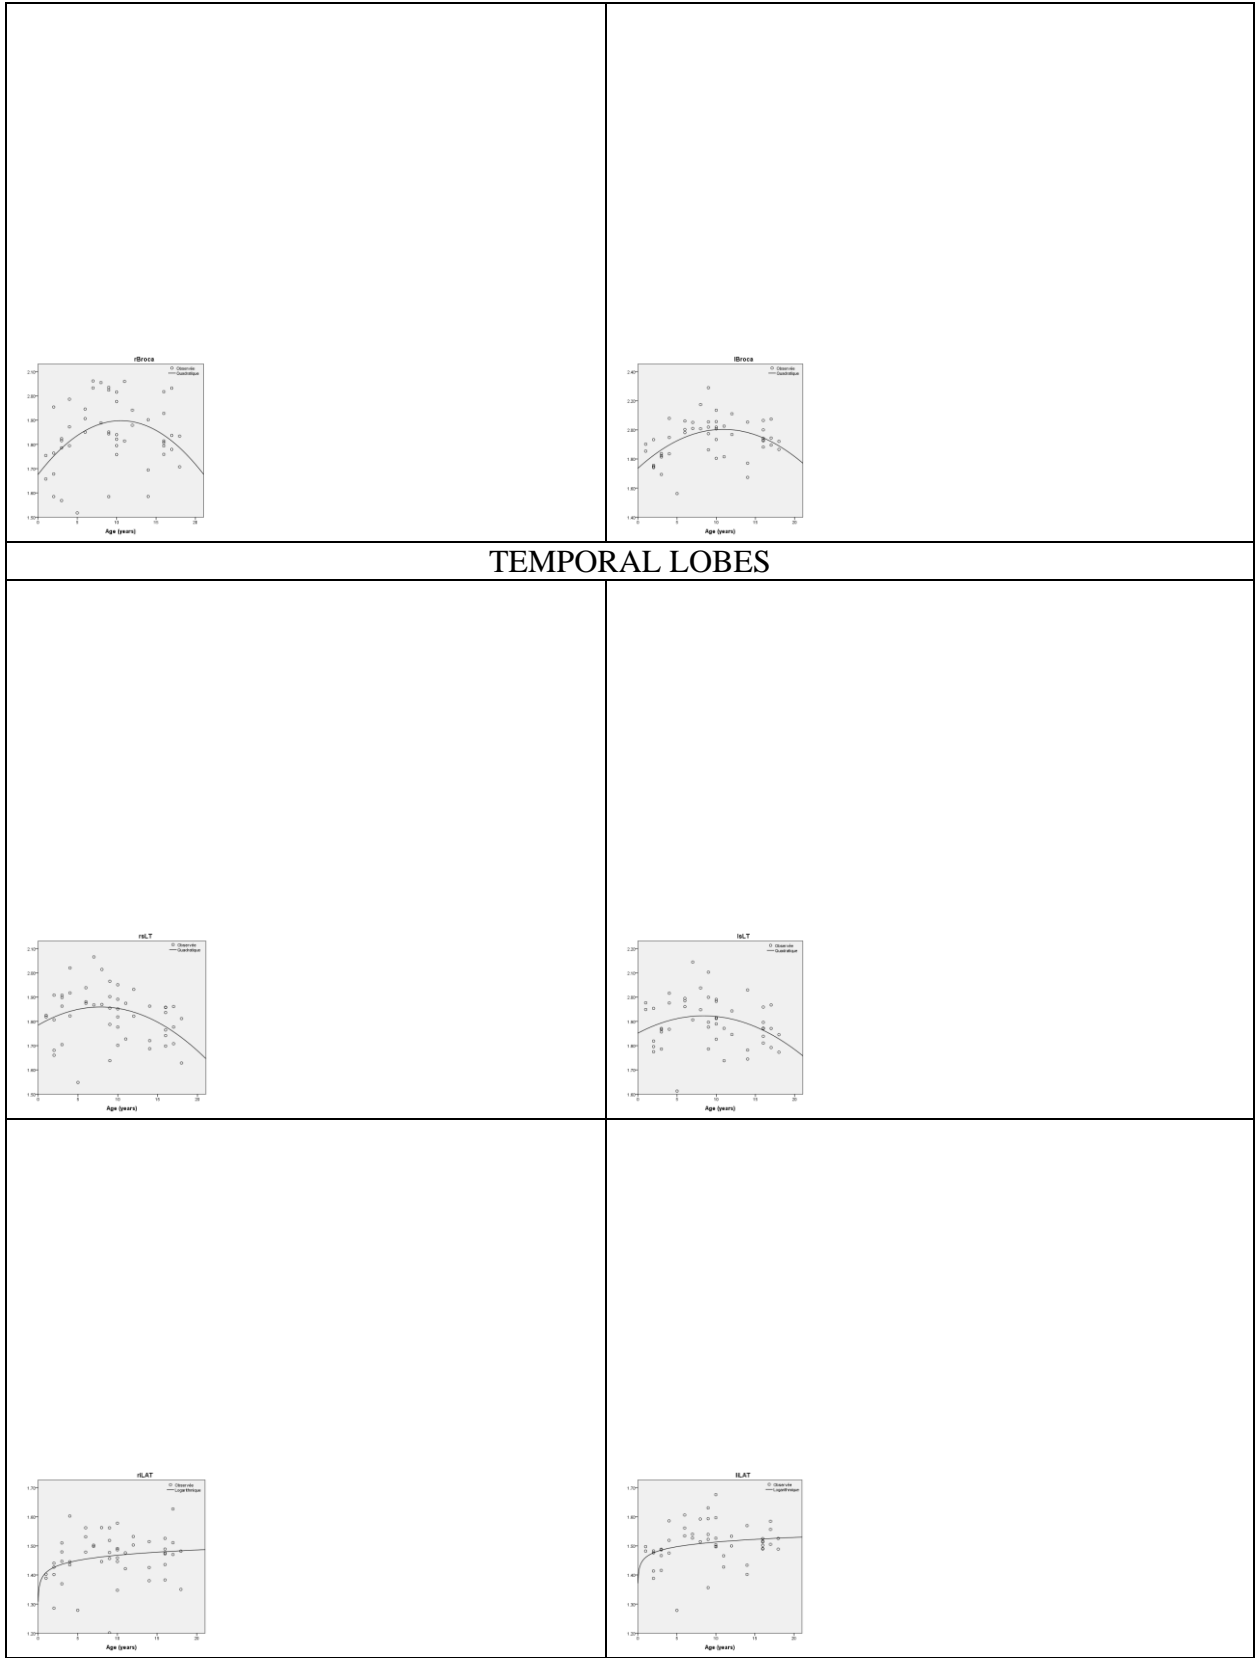

Quadratique = quadratic ; linéaire = linear; cubique = cubic; composé = modified power law; de puissance = power law; logarithmique = logarithm
