

Supplemental Figure 1. Biodistribution of ^{89}Zr -GSK2849330 (A) before treatment imaged with tracer only (mass dose 8 mg) and (B) on treatment imaged with tracer and cold mAb (mass dose 8 mg + 30 mg/kg).

A

B

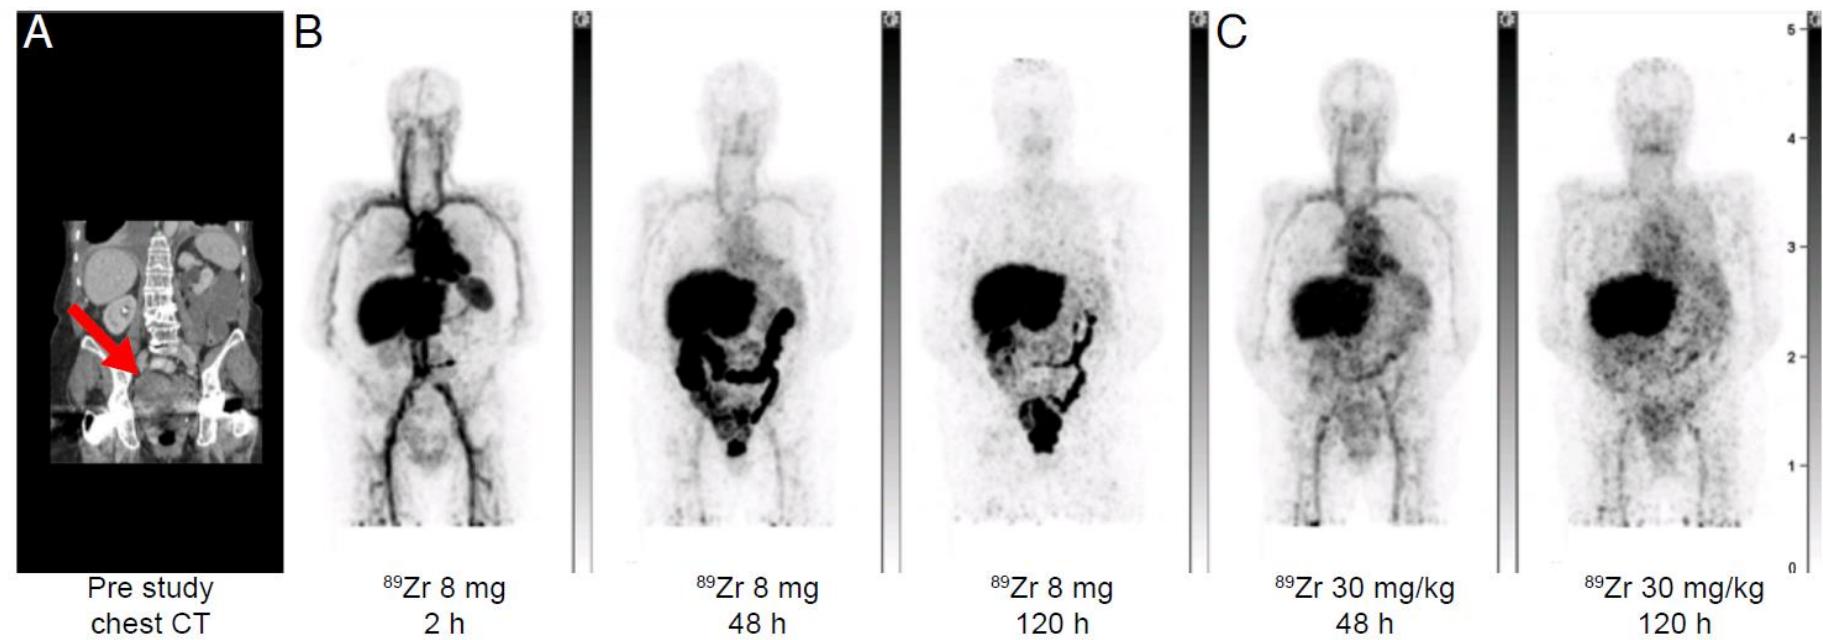

○ Spleen ■ Liver ▲ Lung ▼ Kidney

Error bars represent standard error of the mean.

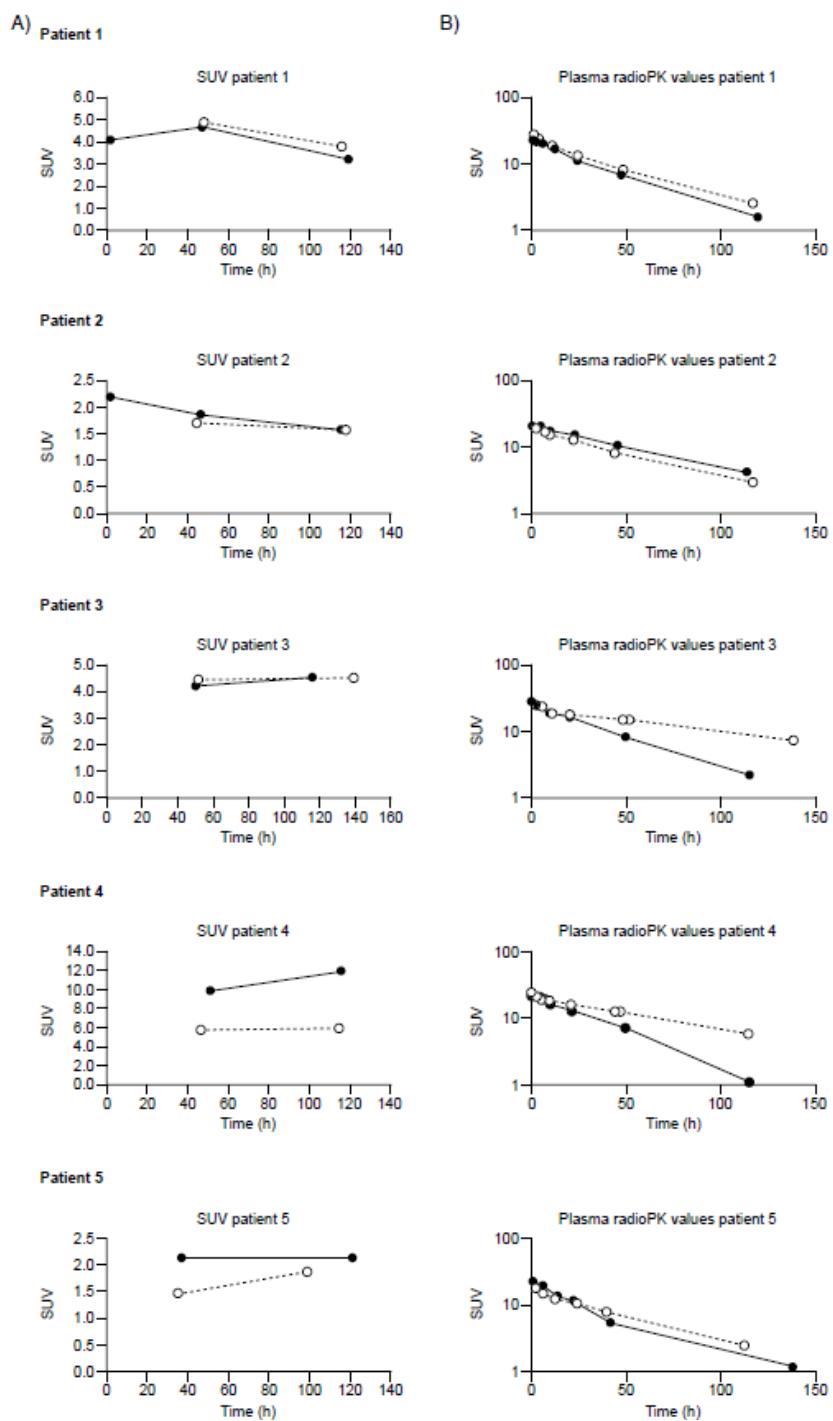

mAb, monoclonal antibody; SUV, standardized uptake value.

Supplemental Figure 2. MIP images of patient 4 seen on (A) pre-study CT scan showing abdominal mass (red arrow); ^{89}Zr -GSK2849330 PET following 8 mg total mAb dose at (B) 2 h, 48 h and 120 h p.i.; ^{89}Zr -GSK2849330 PET following 30 mg/kg total mAb dose at (C) 48 h and 120 h p.i.

CT, computed tomography; mAb, monoclonal antibody; MIP, maximum intensity projection; PET, positron emission tomography; p.i., post infusion.

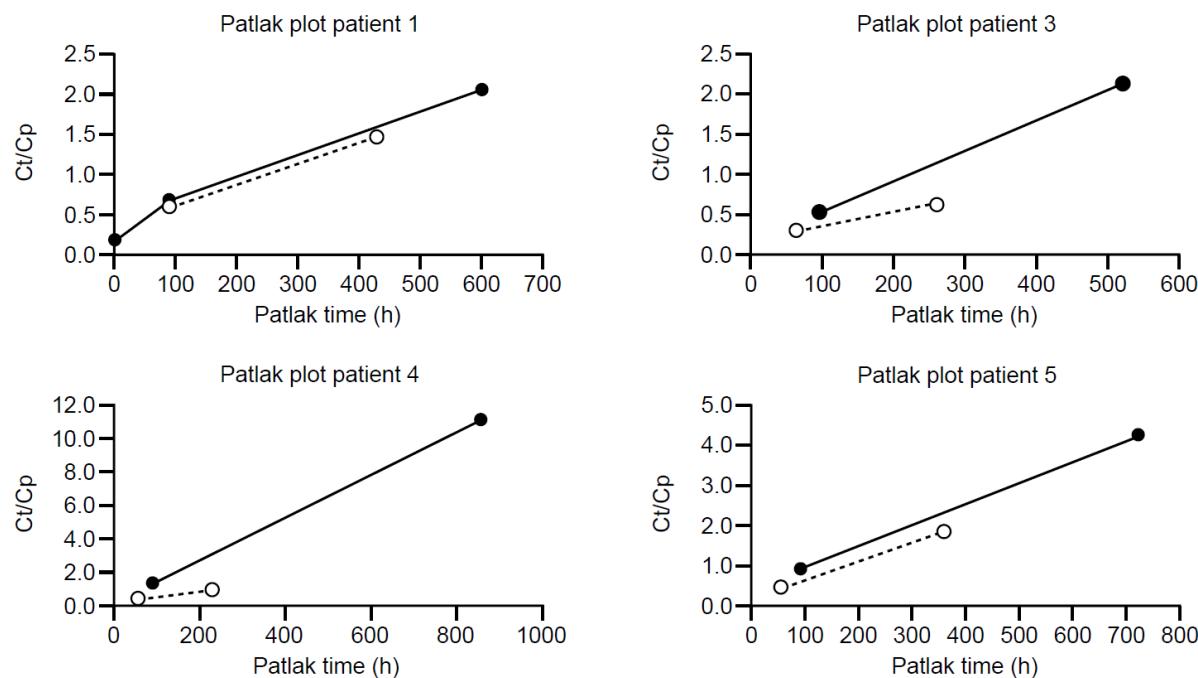

Supplemental Figure 3. (A) Average SUV_{peak} in tumor lesions and (B) SUV_{mean} plasma radio-pharmacokinetic values for all patients. Red lines indicate baseline (8 mg mass dose) and blue lines indicate follow-up with added mass doses of unlabeled mAb (8 mg + 30 mg/kg mass dose).

MAb, monoclonal antibody; PK, pharmacokinetic; SUV, standardized uptake value.

Supplemental Figure 4. Patlak plot for all patients. Patient 3 was given 30 mg/kg in the follow-up study. Red lines indicate baseline (8 mg mass dose) and blue lines the follow-up with added mass doses (8 mg +30 mg/kg mass dose).

A straight line was fitted to the graphs and the slope and intercept values were determined.

Supplemental Table 1. SUV values in plasma for all patients (Patients 1 and 2: Table 1a; Patients 3 and 4: Table 1b; and Patient 5: Table 1c). For reference, tumor SUV_{peak} values (see Table 2) are included.

Body (mSv)	22.072	16.771	21.817	21.122

MBq, megaBequerel; mSv, milliSievert.

Dosimetry result in mSv units = Original result in mSv/MBq units *proper infused dose (in MBq) obtained as the amount in the syringe before administration minus the residual amount in the syringe after infusion.

A=8 mg Hot infusion; B=24 mg Hot infusion; C=1 mg/kg (Hot + Cold infusion); D=3 mg/kg (Hot + Cold infusion); F=30 mg/kg (Hot + Cold infusion); I=0.5 mg/kg (Hot + Cold infusion); G=30 mg/kg Cold infusion (once a week for 5 weeks); H=30 mg/kg Cold infusion (once every 2 weeks).

Hot infusion=89Zr-labeled GSK2849330; cold infusion=unlabeled GSK2849330.
